are housed in a fuse box—the precursor to the main service panel found with modern circuit breaker systems. The fuse box is usually located away from main living areas, such as the garage, laundry room, or basement. If you're unsure whether you have a fuse or breaker box, locate the panel and open it up.

A fuse box and a consumer unit serve the same purpose. They distribute electricity in your house through multiple circuits and instantly turn the power off whenever a power overload occurs on one of the circuits, which is commonly known as “tripping”. When “tripping” occurs, a consumer unit will

# File Type PDF Where Is The Fuse Box In A 2003 Ford Expedition

switch the power off using the circuit breaker linked to the overloaded circuit.

## **Fuse box and consumer unit replacement and costs**

You CANNOT fit a fuse board in a day if you include initial verification and post testing. Also Earth Bonding GAS and Water with 10mm earth cable. Less than

# File Type PDF Where Is The Fuse Box In A 2003

£500 all in and you will have to test on the day which encourages faults on the circuits to be overlooked. £350 is an absolute joke for an electrician in London.
